

100% Naturally-derived

Mylonekton/ Mylonekton R

Natural inorganic substances derived from sea mined in the Tanakura fault zone.

Mylonekton R is grinded and classified to reduce the average particle size to 10 μm or less.

Mylonekton

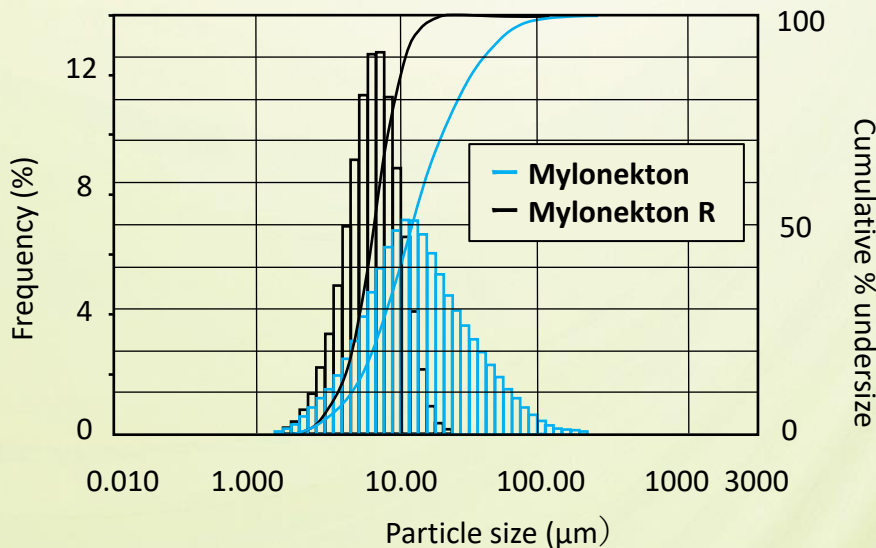

Mylonekton R

Features

- ① Verified by ECOCERT.
- ② Skin dirt absorption effect can be expected due to its porous surface.
(average pore radius 500 Å)
- ③ Skin beautifying effect can be expected due to well-balanced minerals contained.
- ④ Anti-inflammatory effect can be expected due to a small amount of sulfur contained.
